

PRATIKSHA BABSHET

Manufacturing Engineer

+91 8197351525 | pratikshababshet1412@gmail.com | Bangalore, INDIA | [LinkedIn](#)

PROFILE

Manufacturing Engineer with 3.5+ years of experience in aerospace production, industrialization, MES-supported operations, and shopfloor process optimization within Airbus programs. Experienced in digital work instruction deployment, MBOM/routing creation, production readiness, and PLM-driven manufacturing processes using 3DEXPERIENCE and SAP ERP. Strong understanding of manufacturing execution systems, process standardization, and cross-functional coordination in complex production environments.

WORK EXPERIENCE

AIRBUS INDIA PVT LTD

Manufacturing Engineer – Industrialization & Shopfloor Execution

Aug 2023 - Present

- Developed and standardized digital work instructions for Airbus A320 and A350 programs, improving MES-supported shopfloor execution and process consistency.
- Worked with Manufacturing Execution Systems (MES) to support work instruction deployment, process validation, and manufacturing operations.
- Led a team of 5 engineers in digitizing 134+ work instructions using 3DEXPERIENCE, achieving 100% first-time-right delivery.
- Developed MBOMs and production routings to support production readiness and structured manufacturing execution.
- Supported data integration between PLM, MES, and SAP ERP systems to ensure accurate manufacturing data flow.
- Collaborated with Design, Quality, and Manufacturing teams to implement engineering changes and resolve production issues.
- Conducted shopfloor Gemba walks to identify non-conformances and drive corrective actions.
- Improved ground testing efficiency by 20% by resolving 14+ production bottlenecks using Value Stream Mapping (VSM).

Accenture, INDIA

Aerospace Manufacturing Engineer (AIRBUS programs)

Jun 2022 - Jul 2023

- Supported non-conformance analysis and corrective action implementation for Airbus A320 manufacturing operations.
- Supported production and engineering teams in resolving manufacturing issues, improving process compliance and operational efficiency.
- Developed standardized GSE instruction manuals covering tooling, safety, inspection, and installation procedures.
- Interpreted engineering drawings and aerospace specifications to support manufacturing readiness.
- Coordinated with suppliers and tooling vendors to ensure alignment with production requirements.
- Evaluated tooling compliance with EASA aviation safety and quality standards.

TATA - BOEING AEROSPACE

Manufacturing Engineer - Intern

Dec 2021 - Jun 2022

- Supported aerospace assembly processes for AH-64 Apache and Boeing 737 programs.
- Developed manufacturing instructions to standardize assembly execution.
- Created MBOMs from engineering BOMs to support production planning and material management.
- Assisted Material Review Board (MRB) activities by supporting non-conformance analysis and rework documentation.
- Coordinated with engineering teams to implement design changes into manufacturing documentation

CORE COMPETENCIES

Manufacturing & Industrialization

- MBOM & Routing Creation, Production Readiness, Process Planning, Work Instruction standardization, Final Assembly Line Support, Non-Conformity Management, Engineering Drawing Interpretation, Engineering Change Implementation, GD&T, Root Cause Corrective Action (RCCA).

MES & Digital Manufacturing

- MES Deployment & Process Validation, Digital Manufacturing Processes, PLM–MES–ERP Integration, Digital Thread & Production Data Flow, Manufacturing Operations Support, Digital Manufacturing Processes.

Lean & Continuous Improvements

- Value Stream Mapping(VSM), TIMWOODS Analysis, Kaizen, 5S, DMAIC(Six Sigma), Process Optimization, Bottleneck Reduction, Shopfloor Problem Solving.

Tools & Systems

- 3DEXPERIENCE, SAP(ERP), SAP 3D, AutoCAD, CATIA V5, MS Office.

Soft Skills

- Cross-Functional Collaboration, Analytical Thinking, Shop-floor Production Support, Cross - Functional Coordination, Stakeholder Management, Sub-Contractors Management, Continuous Learning.
-

EDUCATION

Bachelors of Engineering in Aerospace | GPA : 1.35

Jun 2018-May 2022

SANJAY GHODAWAT UNIVERSITY, INDIA

LANGUAGES

English – Fluent | German – A2 (Currently Improving Proficiency In B1) | Marathi – Native | Kannada – Native

MENTORSHIP & ENGAGEMENT

- **Early Bird Coordinator** – Supported & guided students by sharing industry knowledge on aerospace careers. Conducted career guidance seminars for pre-university students to provide detailed insights into the aerospace industry.
- **Team Engagement Group** – Organized team activities to improve collaboration, communication, & team bonding.
